

INTRODUCTION TO SETTING UP A HOME COMPUTER OR LAPTOP

Our introductory level support will guide you through setting up, or adding additional devices to, a new computer or laptop.

To enable you to get individual, customized support, we offer this on a “one-to-one” basis (ie just you and a tutor) either in your own home or workplace.

We can cover such things as:

- Setting up the computer or laptop for the first time
- Setting up, configuring and understanding a wired or wireless router to connect to the Internet
- Understanding Internet security and ensuring adequate protection is in place
- Attaching a printer or scanner or other devices (eg wireless mouse, speakers, digital camera etc)
- Introduction to home networking and printer sharing for those with more than one computer in the same household
- Personalizing your settings

We can also cover similar introductions to setting up and using a **TABLET** or **SMARTPHONE**
